

IMAGING WORKSHOP

25 June 2007

Venues at:

*The three Radiology Academies, Leeds, Norwich and Plymouth
A London venue (to be confirmed)*

With live video links to facilitate a national discussion

The very successful imaging forums In April and September 2006 identified much best practice and cultural change in 'imaging' service delivery as well as some barriers to change.

Attendees to this forthcoming workshop, hosted by Dr Erika Denton, National Clinical lead for Imaging will develop and share best practice and action plans to meet the challenge of 18 weeks. Together we will explore what already works in imaging, what does not work and what still needs to be done. We will also look at what support we can share in a team environment.

At the end of the day, the workshop will have developed a strategy for forward thinking and action planning.

Expressions of interest are invited from Commissioners and managers of imaging services – people who have best practice to share or who can take on board best practice and make change happen.

To reserve a place/s please complete the form below and email it to imaging@dh.gsi.gov.uk

We will notify successful applicants by 30 April 2007

Funding – The event is sponsored by the Department of Health and is free to delegates apart from travelling expenses. These should be funded through SHAs/Trusts.

IMAGING WORKSHOP - 25 June 2007

Expressions of interest – Please complete the following details and email to imaging@dh.gsi.gov.uk
